

## **Explanation of the simple statement of account**

### **PART 1, ASSETS WITH INVESTMENT CHOICE**

This section only applies to defined contribution contracts. Total savings in the contract and total contributions of deposits.

### **PENSION ASSETS**

Total pension assets for this group pension at the beginning and the end of the year. Transactions during the year of the simple statement of account included in the pension assets, are specified in the overview described below. The premium reserve for pensioners is specified on retirement pensioners, disability pensioners and survivors' pensioners.

### **PREMIUMS**

Premiums due to be paid during the year.

### **ADMINISTRATION AND MANAGEMENT COSTS**

Total administration- and management costs for the group pension for the accounting year.

### **INSURANCE PAID**

Insurance paid from the group pension.

### **RETURN ADDED**

Specification of the return added to the group pension in the accounting year and how it is allocated.

### **RESULT FOR INSURANCE RISK**

Result of incomes and costs for insurance risk. It also shows the allocation of the result for insurance risk.

PREMIUM RESERVE

120	Balance on 31.12.	Pension assets at the beginning of the accounting year that are sufficient for securing the future pension benefits and costs for pensioners and members that are to be signed out of the group pension.
121	Premiums	The sum of premiums due to be paid during the year, deducted premiums reversed. Billed premiums for administration, management and interest guarantee are not included.
122	Guaranteed yield	The guaranteed result which is transferred to the premium reserve in the accounting year.
123	Administration and management costs for pensioners	The costs for pensioners. These costs are financed from the premium reserve.
124	Calculated costs for insurance risk (death, disability etc.)	The portion of the premium and the premium reserve to finance the annual risk of death, disability and withdrawal. The amount is transferred to the insurance community.
125	Calculated income for insurance risk (long life etc.)	The amount that is transferred from the insurance community to the group pension's premium reserve to finance the annual risk for long life and being fit for work again.
126	Insurance paid	The sum of pensions paid to the pensioners during the accounting year. The amount includes pension transferred to premium fund and any premium exemption/waiver.
127	Changes in premium reserves due to an insurance event that has occurred	If the premium reserve is not sufficient to secure the agreed benefits in the occurrence of death and disability, the shortfall will be transferred from the insurance community to the group pension. The premium reserve can exceed the sufficient premium reserve when an insurance event occurs. Examples are if the insured receives disability pension and recovers, or if the insured dies without survivors. In these examples amounts will be transferred from the group pension to the insurance community.
128	Transferred premium reserve	The sum of all changes in the premium reserves during the accounting year due to the following: <ul style="list-style-type: none"> <li>• Admission of new employees that transfers premium reserves from another group pension.</li> <li>• Sign out of employees that transfers premium reserves to a paid up policy, or the premium reserve are transferred to the premium fund.</li> <li>• Reregistration, changes in the premium tariff, transfer etc.</li> </ul>
129	Balance on 31.12	The pension assets at the end of the accounting year that are sufficient for securing the future pension benefits and costs for pensioners and members that are to be signed out of the group pension.
